Warehousing

Actionable
Insights

Analytics Monitoring
& Delivery

STEP 01

Study the business's management and disparate systems.

STEP 02

Build data connections to extract, analyze & upload data into the digital data warehouse.

STEP 03

Validate the data within the data warehouse, set up rules and quality routines to ensure real-time data analysis.

STEP 04

Connect the data source to the reporting systems and deliver key user driven reports based on pre-defined KPI's and predictive analytics

STEP 05

Transition the system to the users & move into support mode through the use of Virtual Assistants, Chatbots, Phone and Alerts

OUR PLATFORMS

— A full property management and GL accounting software. It is web based and works in all major browsers including IE, Chrome, Firefox, etc.

— Robotic Process Automation (RPA) technology that mirrors human behavior to execute a sequence of steps which lead to a meaningful activity without human intervention

— A web portal that will facilitate their team's work flow and day-to-day processes in a more efficient and optimal way

— A cloud-based financial modeling application that allows commercial real estate and financial institutions to assess real estate property information for maximum returns.

— An occupancy solution that enables users to manage, control and monitor the number of individuals within and around their environments.
